# Industrial parts cleaning with the Perkute Frontloader Series

The PERKUTE parts cleaning machines from the Frontloader series are specially conceived for the simple and effective cleaning and de-greasing of both, high-volume components as well as heavy components, as well as those with complex and sensitive geometries.

The workpieces are loaded through crane charging or with loading trolleys or loading ramps onto the product slide and then into the washing system.

The stainless steel frontloader washing machines with their space-saving, compact design, either work with a driven rotating basket or in the case of sensitive parts, with a nozzle pipe system transported by means of a double-chain, with the products being at rest.

All the process stages like washing, rinsing (not in the case of the FR Series) and drying take place in the same treatment chamber.

A large number of options for preparing the process media leaves almost nothing to be desired.

## CLEAN-O-MAT FR

Cleaning system for large, unhandy parts and small series parts.

### Basic equipment:

- Made of stainless steel
- Simple operation
- Space-saving
- Tank cover, filter basket incl.
- Low water pressure switch as dry-run protection
- Suction filter made of stainless steel in front of the pump
- Adapter for steam extraction
- Minimum operational costs because of housing insulation in sandwich construction
- Rotating blast pipe system incl. fan nozzles
- Adjustable feet
- Pneumatic lift gate
- Programmable electronic control

## CLEAN-O-MAT PF

The modern cleaning center for the powerful cleaning on the highest standard.

### Basic equipment:

- Made of stainless steel
- Compact and sturdy construction
- Modern design
- Powerful washing pump
- High permissible basket load
- Low water pressure switch as dry-run protection
- Tank cover in the return flow, filterbasket incl.
- Programmable electronic control, operating counter incl.
- Complete machine housing
- Loading carriage incl. Grate bearing
- Digital temperature indication
- Electronic basket drive (PF 100, PF 150)
- Square blast pipe system (PF 200)
- Rotation blast pipe system (PF 300)
- Adjustable feet

PF 300 with load travelling carriage

Dismantled tank with valve control and evacuation pump

Engineering room

Clean-o-mat FR 90 drum facility and conveyor belt incl.

Clean-o-mat FR 70 with load travelling carriage

(Standard) Rotating blast pipe system

(Option) Square blast pipe system

Square blast pipe system (PF 200)

PF 100 with loading platform, receiving device, gun for manual parts cleaning and compressed air pistol

Clean-o-mat PF 150 with loading platform
